Submittal Checklist for Residential Remodel, Repair, or Replacement Projects

To facilitate a building project and the city's permit process, submittals for building permits must be complete at time of application. The following required submittals constitute a complete application for a Building Permit. Plan reviews for permit approval will not begin until a complete application is received. If the submitted documents are not accurate or additional information is required, delays in the approval process may occur.

All construction documents shall be dimensioned and drawn upon suitable material. Construction documents shall be of sufficient clarity to indicate the location, nature, and extent of the work proposed and show in detail that it will conform to the code and relevant laws, ordinances, rules, and regulations, as determined by the building official. Any plans that are not legible, dimensioned, or submitted on unsuitable material will not be accepted.

Permitting time will depend on project complexity, completeness of plan submittals and number of already received project submittals. If needed, a pre-design process is provided, and a preliminary meeting will be scheduled to answer questions and assist in the application process. Please allow up to 10 days for plan review. Plan reviews will not start until all submittals have been made.

SUBMITTAL DOCUMENTS

- Building Permit Application** – A completed building permit application. (2 Pages)
- Plans Submittals** – See requirements below
- Roof / Floor Truss Shop Drawings** – Must be submitted prior to framing inspection. - If applicable to the project.
- Engineered Drawings & Engineered Product Design Info** – If applicable to the project.

- Mechanical Permit Application** – Required for furnace, boiler, or AC unit replacements, or when any additions or alterations are to be made to any of the following: duct work, hydronic piping, kitchen and bathroom exhaust fans, dryer duct work, fireplaces, and any gas piping longer than 5 feet. A completed mechanical permit application must be submitted before building permit will be issued.

- Plumbing Permit Application** – Required for water heater or water softener system replacements or when any additions or alterations are to be made to the drain, waste, and venting (DWV) system or to the water piping system. A completed plumbing permit application must be submitted before building permit will be issued. Non-homesteaded properties require a city licensed plumbing contractor.

Electrical permits are Issued by the State of Minnesota. Contact Mike Wenzel for additional information @ 218-270-2265.

REQUIRED PLAN SUBMITTALS

- Reversed plans are not accepted. The plans must match the existing construction layout.
- Optional features shown on the plans must be marked as "Selected" or "Not selected" to provide clarity.
- It is not acceptable to indicate "per code" or similar statements in lieu of dimensions or specifications.
- Additional information may be required for some projects. This will be determined during plan review.

Remodel and Repair Projects–

Floor Plan(s) – Complete plans for each floor that is included in the scope of work to be completed, including basement, and finished attic space. Items to be included if applicable to project:

- a. Include one set of plans showing the existing layout of the structure's interior walls, windows, and doors.
- b. Include one set of plans showing the proposed work and layout
 - i. Indicate walls and rooms that are to be included in the scope of work that is to be performed.
- c. Room use identification with unfinished spaces identified
- d. New door and window locations, sizes, and header sizes
- e. Identify all beams, posts, and headers (material and sizes)
- f. Floor joist type, size, spacing and direction
- g. Location and size of stairs, tread and riser dimensions, and direction of travel
- h. Rafter/truss size and spacing

- i. Location of smoke and carbon monoxide detectors
- j. Locations of furnace, water heater, electric panel, air exchanger, sump basket, washer, dryer, fireplaces, kitchen, and bathroom fixtures

Window/Door Replacement –

- Window Replacement Floor Plan** – Complete a floor plan showing the location of the replacement windows and doors

The above submittals define a **complete application** for a Building Permit for residential replacement, repair, or remodel project. (MSBC 1300.0130). The plans and submitted documents will be reviewed within 10 working days from receipt of the **complete application**. If the submitted documents are not accurate or additional information is required, delays in the approval process may occur. You will be contacted when the plan review (if required) and fee calculation has been completed. Upon receipt of payment, and any required plumbing or mechanical permits, the permit will be issued.

THIS IS AN APPLICATION FOR A PERMIT – DO NOT START WORK UNTIL PERMIT HAS BEEN ISSUED.

Additional permits are required for electrical, HVAC, and plumbing work. This permit becomes null and void if the work authorized is not commenced within 180 days of the date of issuance, or if the work is abandoned or suspended for a period of 180 days.

CERTIFICATION STATEMENT: I hereby certify that: I am authorized to make this application; all information provided on this application or in other submittals is true and accurate to the best of my knowledge; authorization from the owner to perform the proposed work has been granted; I understand that I am fully responsible for all work performed and all work performed as part of any permit will comply with all applicable state and municipal laws and ordinances, and any required contractor license, personal license, or certificate of competency will be obtained prior to any work being performed. I understand that the issuance of a permit does not grant any contractor license, certificate of competency, business license, or other license, and unlicensed persons shall not be hired to perform work that requires a license or certificate of competency.

- 1 - MN State Contractor Licensing and Bonding requirements apply.
- 2 - Additional licensing may be required by the city (See Handout).
- 3 - Property owner must read and sign waiver below if listed as general contractor.
- 4 - Property owner must occupy property if listed as plumbing contractor.

Property Owner Waiver

The purpose of this waiver is to have property owners acknowledge their responsibilities to the Minnesota State Building Code, Brainerd Zoning Ordinances, and to other applicable rules and regulations when they are acting as general contractor on building projects.

I understand that the State of Minnesota requires that all residential building contractors, remodelers, and roofers obtain a state license for work performed on residential real estate (as defined by Minnesota Statute 326B.802, Subd. 13) unless they qualify for a specific exemption from the licensing requirements. By signing this waiver, I attest to the fact that I am building or improving my property myself. I claim to be exempt from the State licensing requirements because I am not in the business of building on speculation or for resale, and this is the first residential structure that I have built or improved in the past 24 months.

Furthermore, I acknowledge that I may be hiring independent contractors to perform certain aspects of the construction or improvement of this property. Some of these contractors may be required to be licensed by the State of Minnesota. I understand that unlicensed residential contracting, remodeling, and/or roofing activity is a misdemeanor under MN Statute 326.92, Subd. 1 and that I forfeit my rights to reimbursement from the Contractor's Recovery Fund if any contractors that I hire are unlicensed.

I have also been informed and acknowledge that by listing myself as the general contractor on this project, I am solely and personally responsible for any violations of the State Building Code and/or City Ordinances in connection with the work performed on the property.
